

The right light for your tasks

Glamox C81

Hans Bleken Rud
Designer

Despite its simple and geometrical starting point, the C81-P has several possibilities and features.

The aim of the design was to create a high-quality, compact luminaire which at the same time has the option of different optical systems and aesthetic expressions. The idea is that it should underpin and adapt to the architectural concepts in which it is placed.

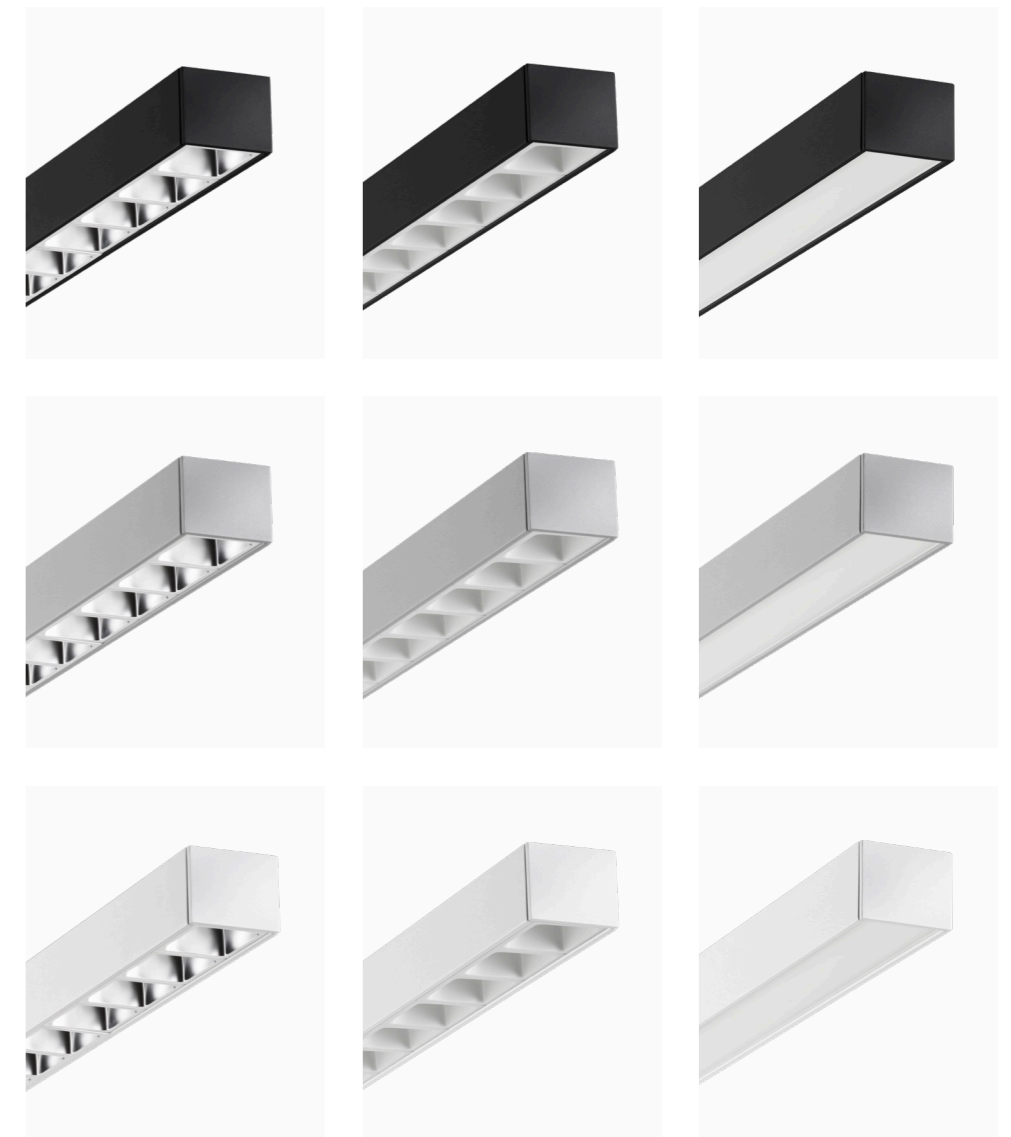

By arranging the space-consuming electrical components in the centre of the luminaire, space is freed up towards the ends for the light itself, while keeping the luminaire compact in size, so that a break in the light's monotony occurs.

In short: the design has been kept simple and sleek, while the optical lighting technology is advanced and efficient. All wrapped in a solid and compact aluminium housing.

Perfect workstation lighting

The C81-P is a slender pendant luminaire with a contemporary design. Its slimmer aluminium profile housing has a more modern appearance – sharp edges, no visible screws in the end caps and an attractive selection of optics. The C81-P was designed specifically with LED technology in mind. It offers a high efficacy of up to 150 lm/W, with improved sensors, minimised glare and possible separate up- and downlight functionality. This makes it a go-to solution for small cell offices, open-plan offices and meeting rooms.

Choose the right variant for your task

You can choose the right C81-P variant for any task by selecting the optics that suit your needs. The silver matte reflector provides exceptional efficiency at the workplace, while the white matte reflector creates a particularly elegant impression if you have high aesthetic aspirations. Microprismatic variants provide additional glare control, but all versions of the luminaire feature a blind spot in the middle, which also prevents excessive dazzling. This feature is especially useful at individual workstations. You can mix the colour of the body and the optics to obtain the best visual result for your space.

Silver matte reflector (SM)

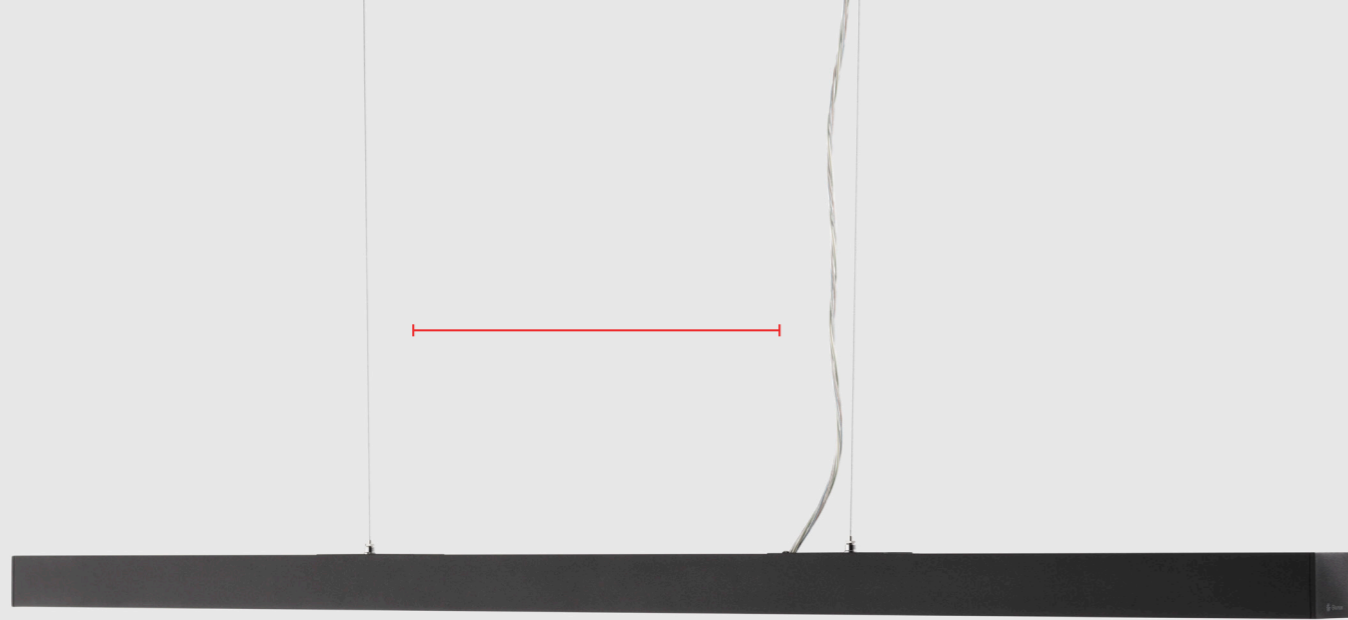

- The highest efficiency
- The best glare control
- Highly technical design

White matte reflector (WM)

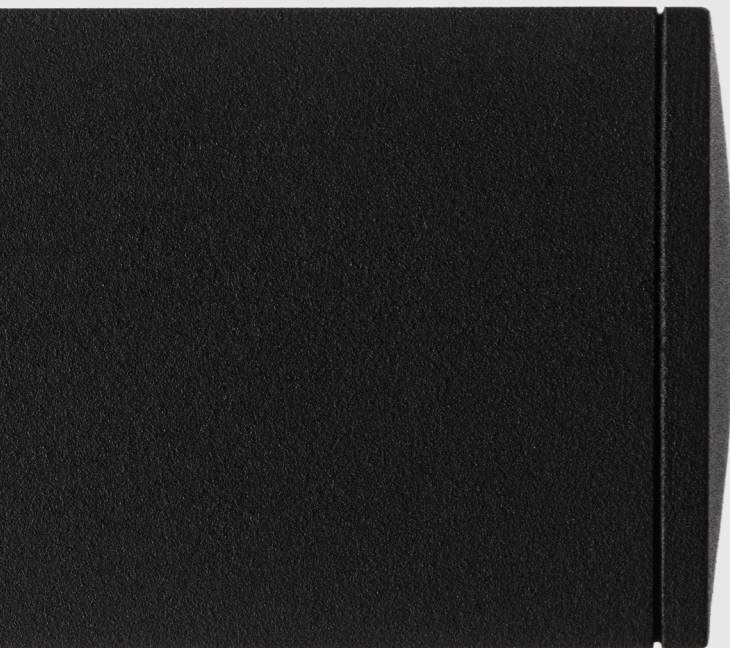

- Exceptional aesthetics
- High efficiency

Microprism (MP)

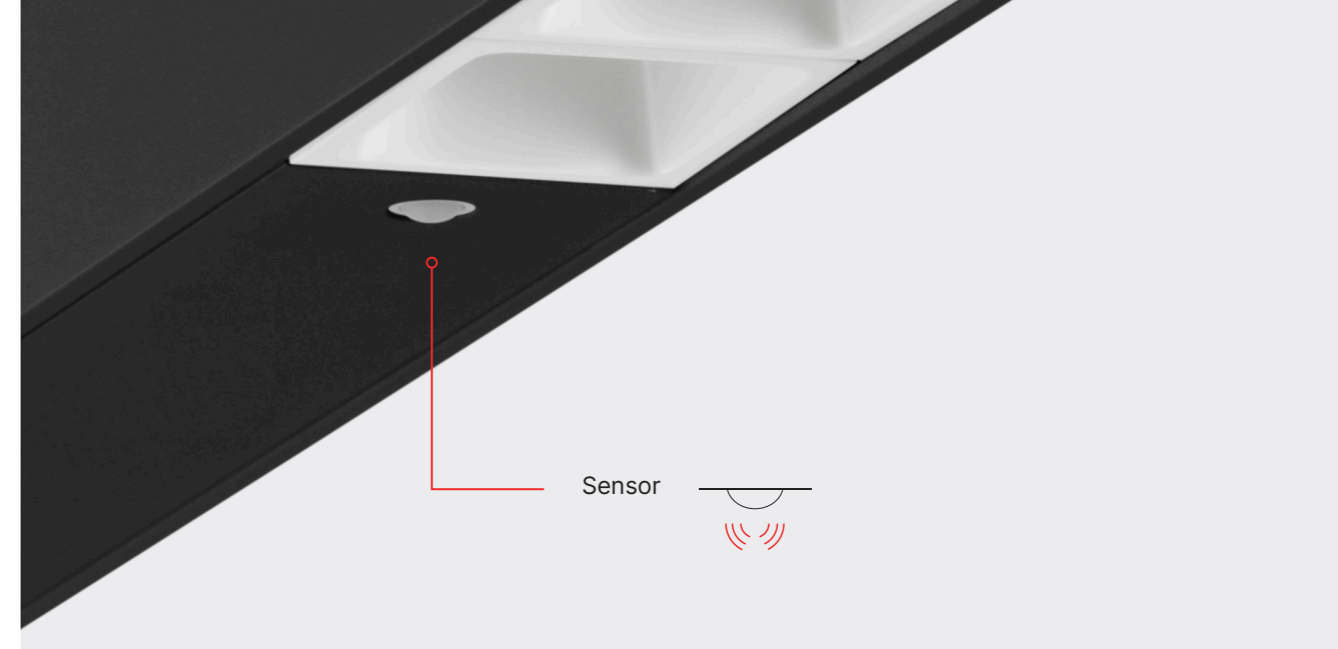

- A fully illuminated diffuser
- High light uniformity
- Very good glare control

The distance between the suspension wires is a perfect fit for modular ceilings and additionally shortens installation time. The wires placed at the centre of the luminaire underline the modular division of the optics and harmonise with the design of the ceiling.

The right smart light

By combining the C81-P with smart technology, you can gain a lighting solution that provides great benefits and is perfectly tailored to your needs, different tasks and purposes.

Features like daylight and presence sensing drastically reduce energy consumption, often by 90% or more in refurbishment projects. With smart use of energy, the installation's lifetime is also extended. Another advantage of using smart lighting is optimising the light quality and achieving outstanding visual comfort thanks to solutions that mimic the qualities of daylight.

With our commissioning services, various lighting scenes and monitoring functionalities can be installed with professional precision. We offer wired and wireless lighting controls that ensure great flexibility and scalability, and are easy to install and use. Overall, you get a more sustainable lighting solution that can be adapted to meet any specification.

You define. We connect.

The Glamox Group

Glamox is a Norwegian industrial group that develops, manufactures and distributes professional lighting solutions for the global market. Our mission is to provide sustainable lighting solutions that improve the performance and wellbeing of people.

High performance and ease of use

Our solutions are designed to combine high performance and sustainability with simplicity and ease of use, offering a superior customer experience. We make smart use of the latest technology and supply it with generations of experience and true care for our customers and their people.

Quality brands and dedicated support

We offer our solutions through a range of quality lighting brands. Regardless of brand, the close follow-up of each customer is at the heart of our offering. Whether in a production facility, a fishing vessel or an office building, our ambition is to provide lighting that contributes to a better life for the businesses we serve and those who work there.
