

Unique and intriguing

Glamox C94-P

Hans Bleken Rud
Designer

“We wanted to design a luminaire with a clear, distinctive character and with an untraditional structure, without endcaps.”

- / Luminaire length - 1350 mm
- / Lumen packages - 4000 / 6000 lm

Impressieve kwaliteit, doeltreffendheid en effectieve verblindingscontrole

De nieuwe serie van LED-verlichting is ontworpen met de hoogste kwaliteit en doeltreffendheid. Het is een perfecte combinatie van technologie en design. De verlichting is ontworpen met een slimme verblindingscontrole die de lichtintensiteit aanpast aan de omgeving. Dit zorgt voor een optimale verlichting die de ogen beschermt en de energieconsumptie vermindert.

A premium aesthetic experience

Some spaces need that special something. A thoughtfully selected piece of discreetly decorative architectural lighting may just be what you need to put the finishing touch on an elegant residential interior or a fancy start-up office.

Outstanding craftsmanship enhanced by excellent lighting solutions

The C94-P not only excels in delivering high-quality lighting, but also stands out due to its exceptional design, allowing it to meet the demands of users and lighting consultants alike.

The luminaire's streamlined and subtly rounded shape adds an intriguing and captivating touch to any interior setting. This product is available in three timeless colours – black, white, and grey, seamlessly integrating undeniable visual appeal with integrated light management solutions and energy-saving IR sensor technology.

Two infrared sensors control the direct and indirect portions of the light emitted by the C94-P. Adjusting the desired illumination level is as simple as touching these switches, and later giving them a quick tap to switch off the light completely.

These attributes ensure exceptional lighting performance while meeting aesthetic expectations, positioning the C94-P as an excellent choice for innovatively designed start-up offices, loft spaces, open-plan work areas, and reception desks.

Meticulously fashioned from two extruded and bent aluminium pieces, the C94-P's design expertly conceals any visible fastening elements in the endcaps. Its sleek, subtly rounded form not only imparts an alluring aesthetic to any interior environment. C94-P is made from 100% recycled aluminium.

- / Rounded shape
- / 2 pieces of bent aluminium

/ Multi-layer microprism optics

- / An edge-lit diffuser for excellent light uniformity
- / A clever balancing mechanism
- / Grey, white, and black colour variants available

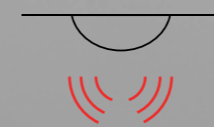

IR switch C94-P offers full individual control of the light. It is equipped with two infrared switches, one for direct light and one for indirect light.

Integrated light management solutions allow you to save plenty of energy. This can further be enhanced with the use of IR sensor technology.

This infrared sensor solution was specifically designed for controlling both direct and indirect lighting. By simply touching these switches, you can easily adjust the light intensity to your preference. To turn off the light, a brief tap is all that is required.

Sensor
Advanced wireless sensors are indispensable elements in user-friendly and energy-efficient lighting installations in offices and schools

Different spaces have varying lighting requirements and user expectations. The C94-P can be adapted to suit individual needs depending on a given interior's purpose.

That being said, it always guarantees compliance with the applicable lighting standards, delivering superb $UGR < 19$ glare control and the appropriate illuminance of 500 lux with 0.6 evenness on the defined working surface in accordance with the EN 12464-1 standard.

The Glamox Group

Glamox is a Norwegian industrial group that develops, manufactures and distributes professional lighting solutions for the global market. Our mission is to provide sustainable lighting solutions that improve the performance and wellbeing of people.

High performance and ease of use

Our solutions are designed to combine high performance and sustainability with simplicity and ease of use, offering a superior customer experience. We make smart use of the latest technology and supply it with generations of experience and true care for our customers and their people.

Quality brands and dedicated support

We offer our solutions through a range of quality lighting brands. Regardless of brand, the close follow-up of each customer is at the heart of our offering. Whether in a production facility, a fishing vessel or an office building, our ambition is to provide lighting that contributes to a better life for the businesses we serve and those who work there.
