

Nordic Collection

Decorative pendants

Luxo Nordic Collection

Nordic Collection is our family of seven decorative pendants, inspired by Nordic nature. The Nordic landscape is unique with its contrasts, ambient light and soft surroundings, ranging from the sharp mountain peaks through dense forest, soft rivers and weather-beaten coastal lines.

As in nature, our pendants are designed to be both decorative and functional, creating the ambience you need. They are both elegant and rough, soft and gentle – just like the Nordic nature.

Discover the essence of Nordic light through Luxo's visionary designs, and find the pendant that fits your next project.

Inspired by Nordic nature

With our award-winning collection*, we have dived into our Nordic heritage, and gained inspiration to both shape, light and colour. The collection evokes a sense of connection to the vast and diverse landscapes, with light that gracefully and fluidly unfolds in harmony with the elements.

* In 2021 SVA, ELV and SNÖ wa awarded the internationally acclaimed Red Dot Award.

SVA

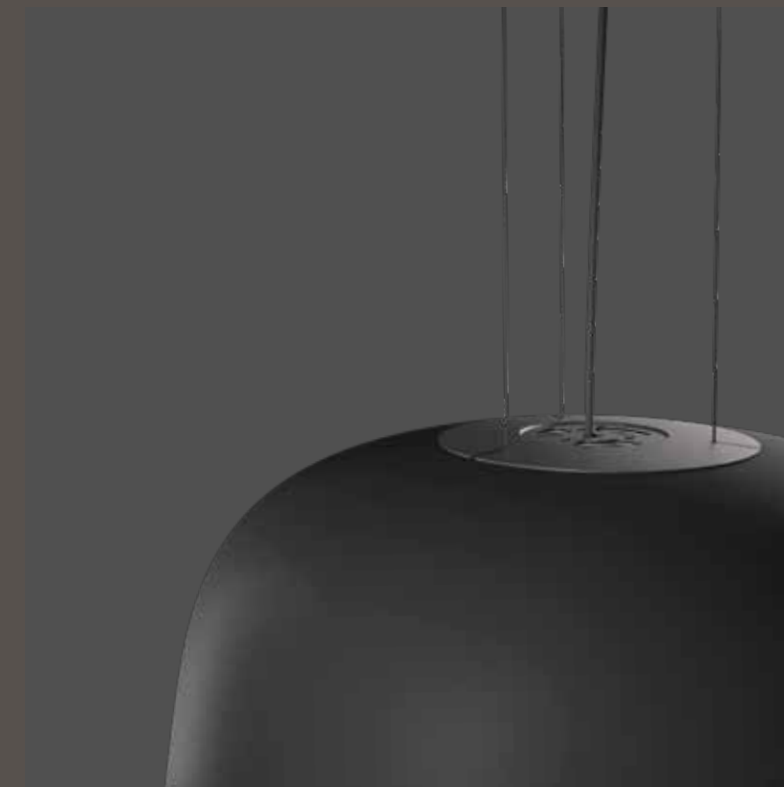

Elegant and rough

– like smooth weathered rocks

Envision the distinctive rock formations found along the Nordic coastal line. Mirroring their rugged yet refined surface, SVA radiates a contemporary yet discreet ambiance. SVA seamlessly integrates into social areas, meeting rooms, restaurants, and various public spaces. While the pendant possesses confidence alone, SVA brings an added touch when paired with other sizes or colours.

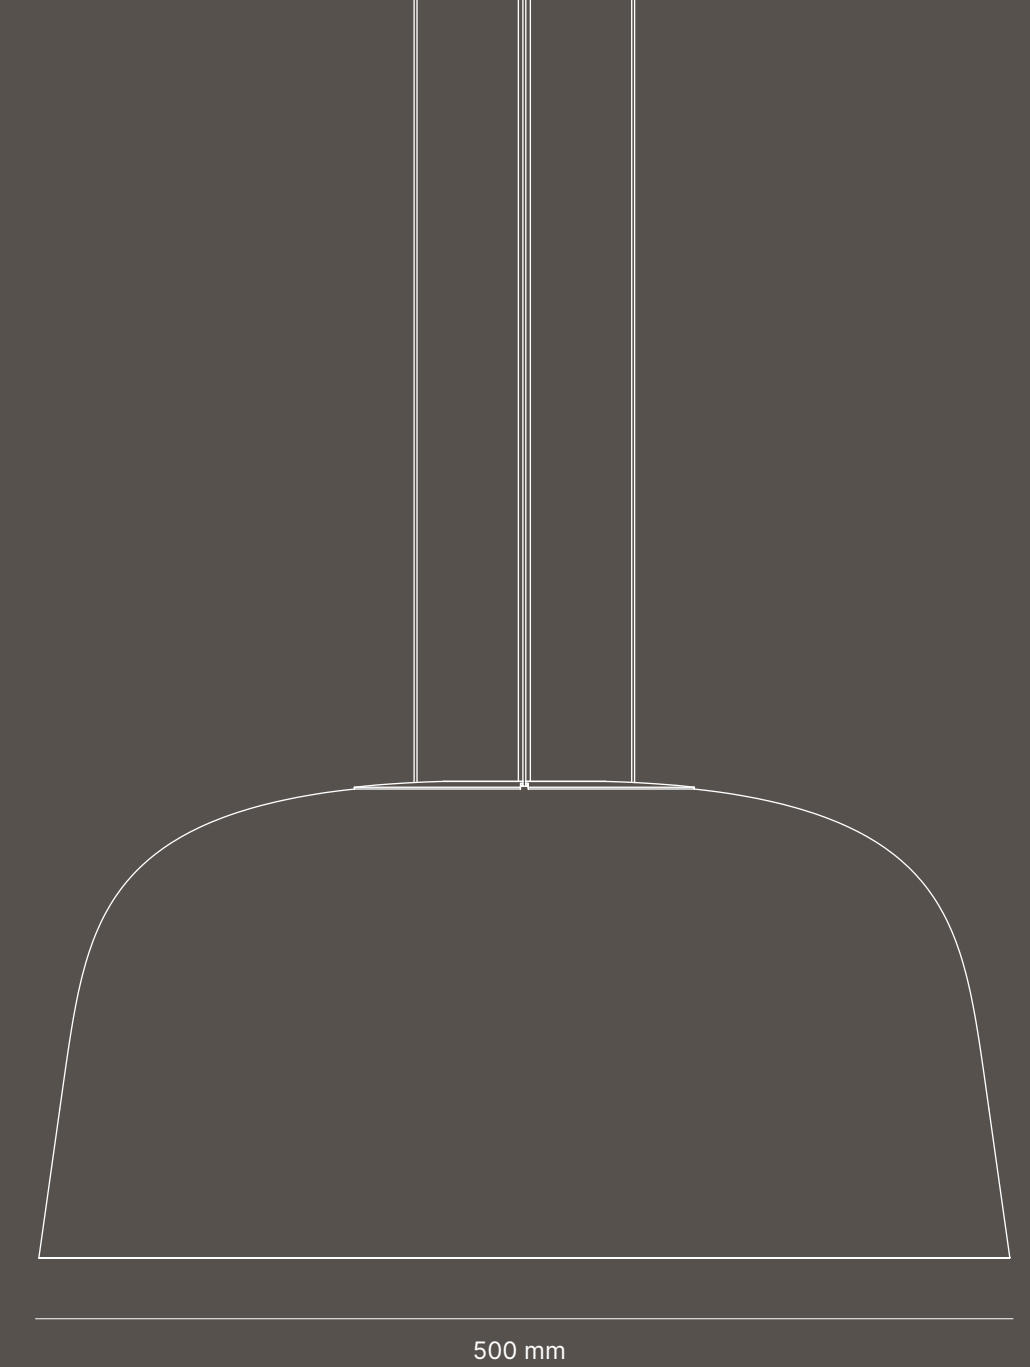

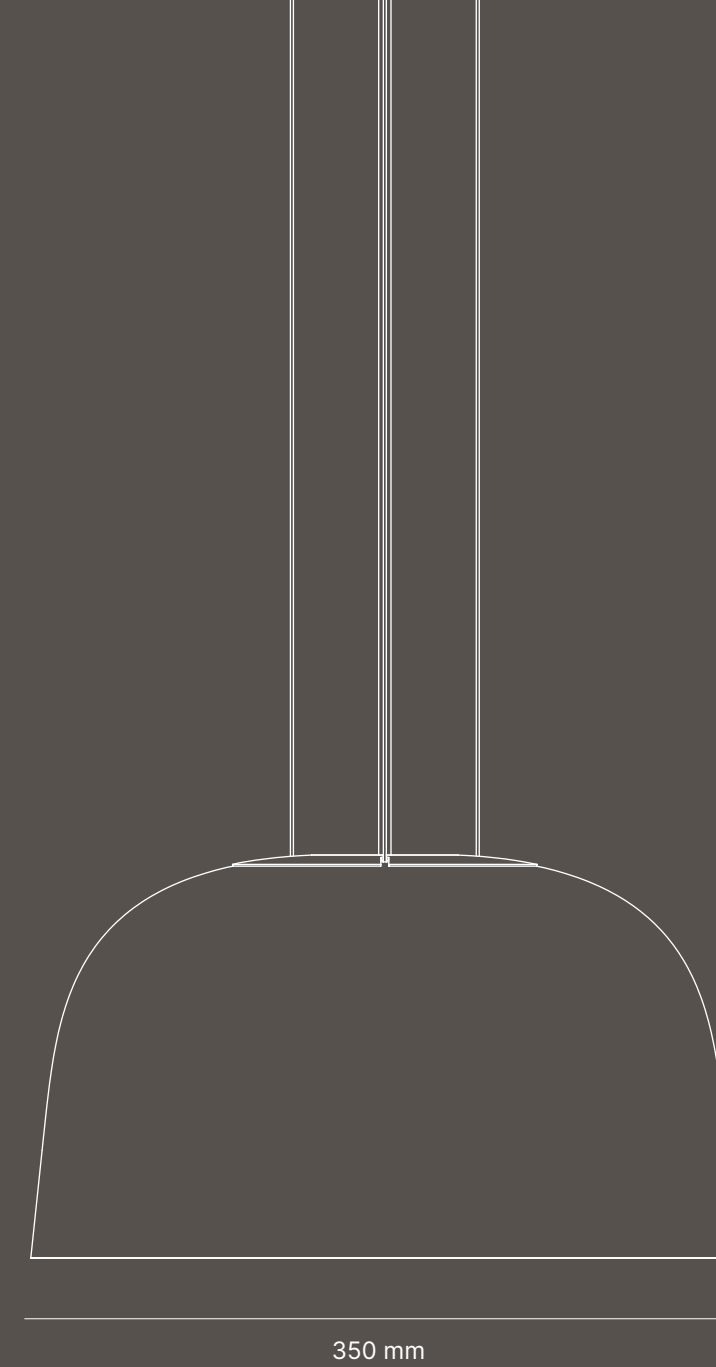

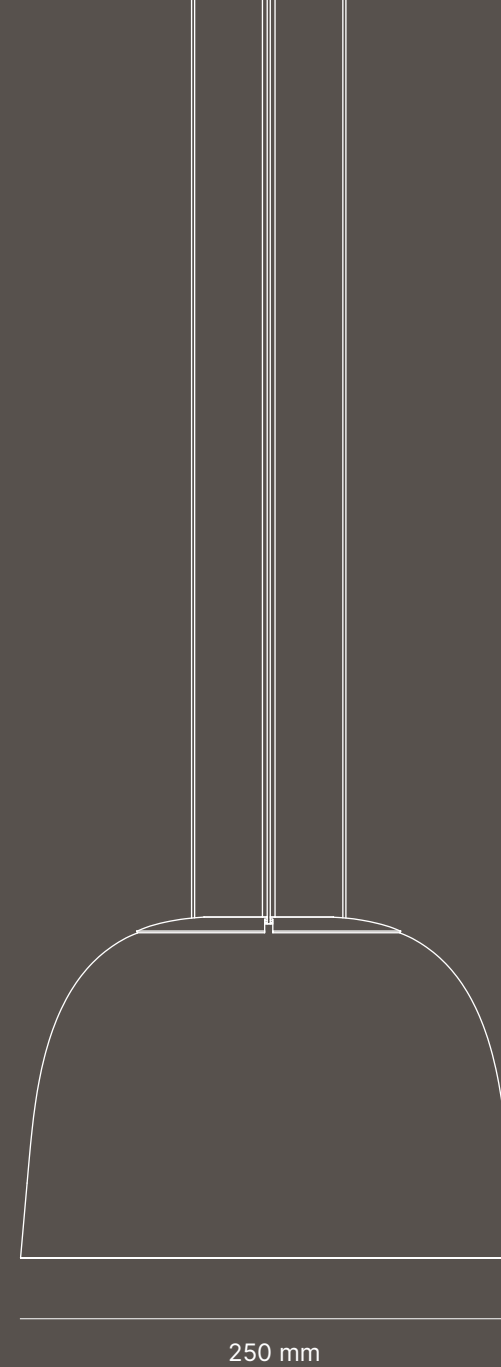

SVA has a powder coated steel shade, giving it a modern look and feel. The surface has a matt finish adding to its elegant yet rough appearance. Available in three different sizes, and three standard colours in addition to the Luxo Colour Concept.

SVA

Light source	LED
LED Colour temperature	3000 K, 4000 K, Tuneable White 2700–6500 K
Drivers	DALI / Switch-dim
Body material/colour	Powder painted steel shade in black, white or grey Also available in colour concept or other colours on request
Optics	Cone diffuser
Cable/wire length	2 metres. Longer suspensions on request

ELV

Mirrors like water

ELV's mirror-like surface resembles the way a stream's flowing water curiously mirrors its environment, resulting in a captivating transformation. The transparent surface creates an illusion of solidity while reflecting the surroundings. Unexpectedly, once lit, the diffuser emerges, introducing an element of surprise. ELV effortlessly infuses contemporary elegance into any space.

ELV's captivating shade showcases a refined misty tint. Crafted from mouth-blown glass each piece possesses a distinct finish, adding a touch of exclusivity. ELV is offered in a range of three sizes, providing versatile options to suit any preference.

SNÖ

Soft as the first fall of snow

Have you ever felt the gentle touch of the first snowfall, as it transforms its surroundings with a soothing ambiance? This imagery perfectly encapsulates the essence of SNÖ. With its tender and timeless design, it effortlessly blends into any setting, whether displayed individually or arranged along pendants of various sizes.

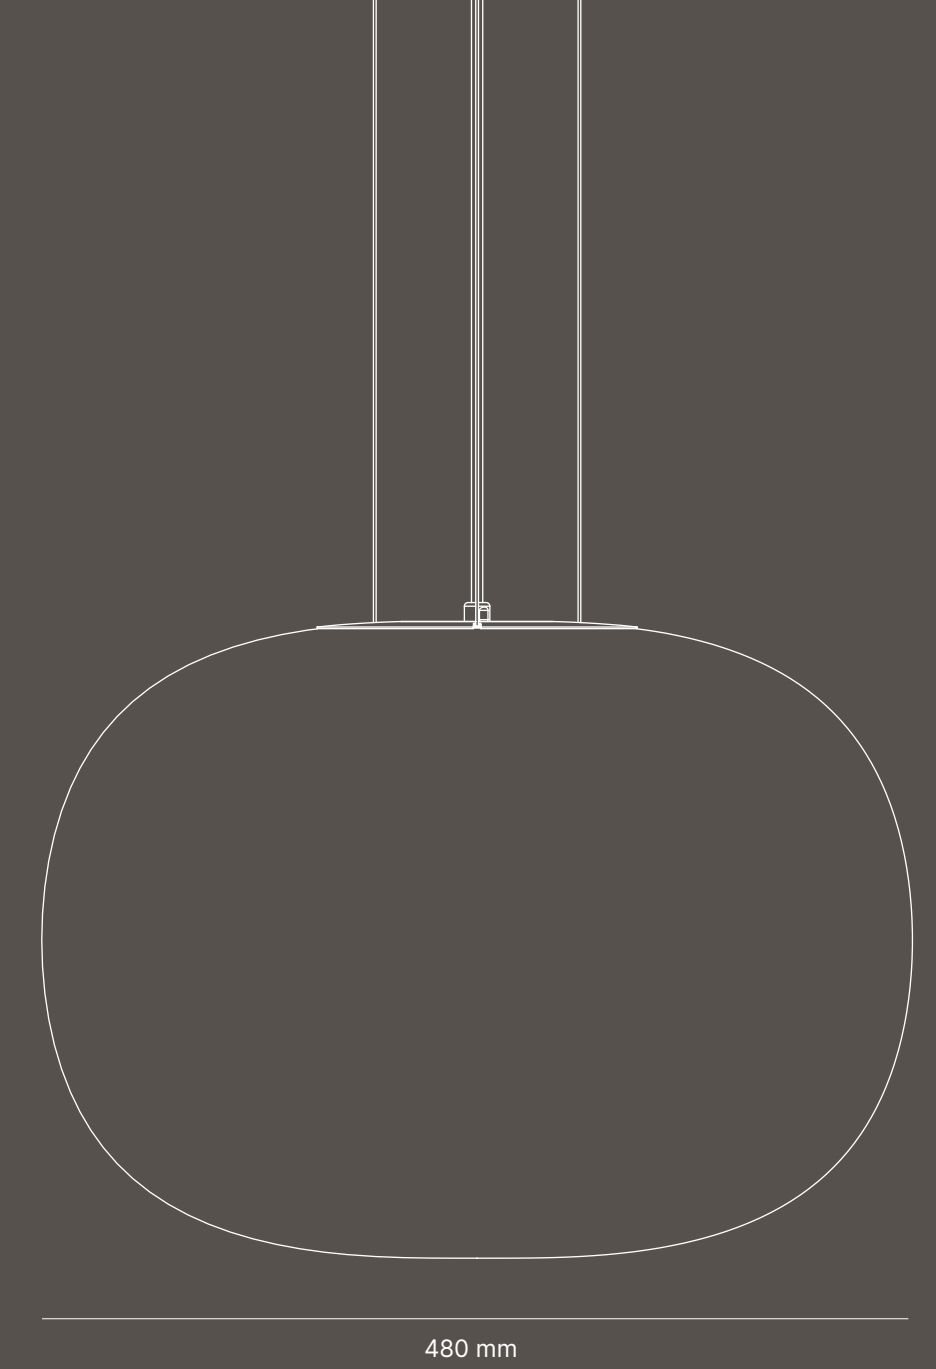

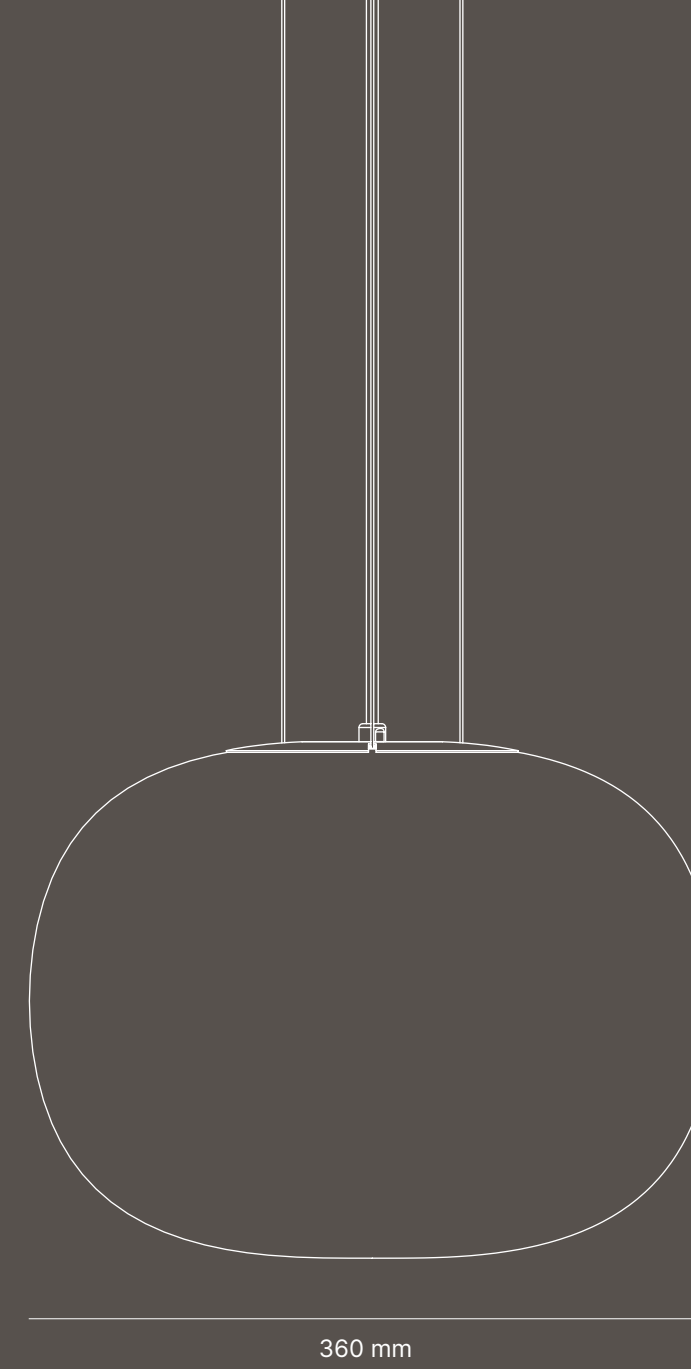

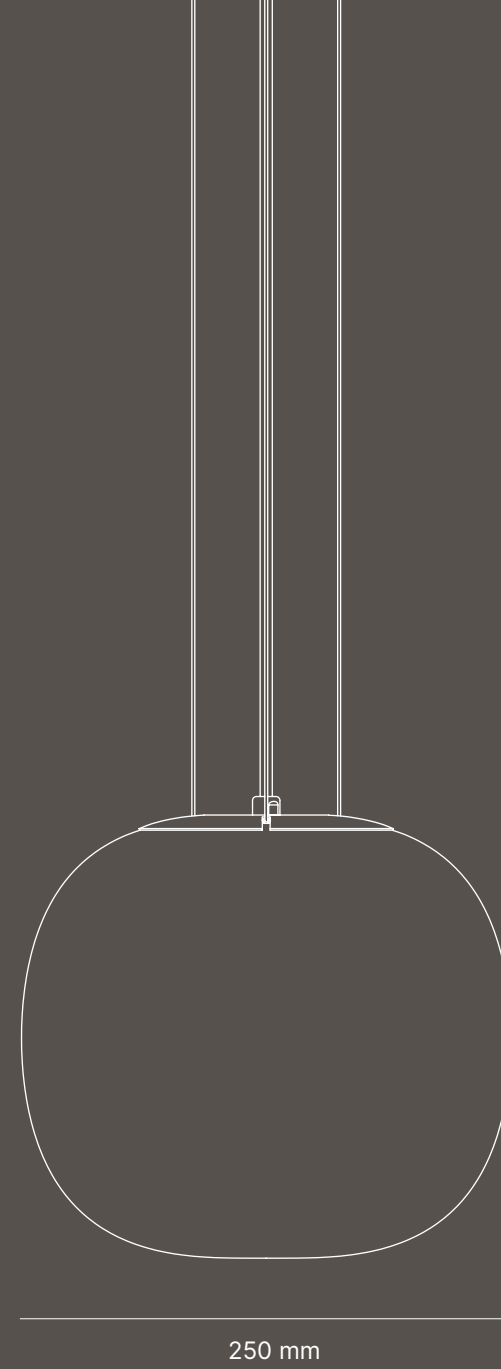

SNÖ has a semi-transparent, hand-crafted glass dome, delicately cradling a softly suspended silicone diffuser, creating an illusion of weightlessness. For those seeking an alternative, a frosted finish option is also offered.

SNÖ

Light source	LED
LED Colour temperature	3000 K, 4000 K, Tuneable White 2700–6500 K
Drivers	DALI / Switch-dim
Body material/colour	Painted glass
Optics	Silicone dome diffuser
Cable/wire length	2 metres. Longer suspensions on request.

DIS

Like a thick early morning mist

DIS reminds us of a thick early morning mist when the sun barely glazes through. The shape grows organically with a continuous curvature, giving each dome the perfect form relative to its size. This makes it suitable as a stand-alone luminaire, as well as combined in clusters. DIS has a calming, natural look with a diffuse glass dome and a growing light intensity.

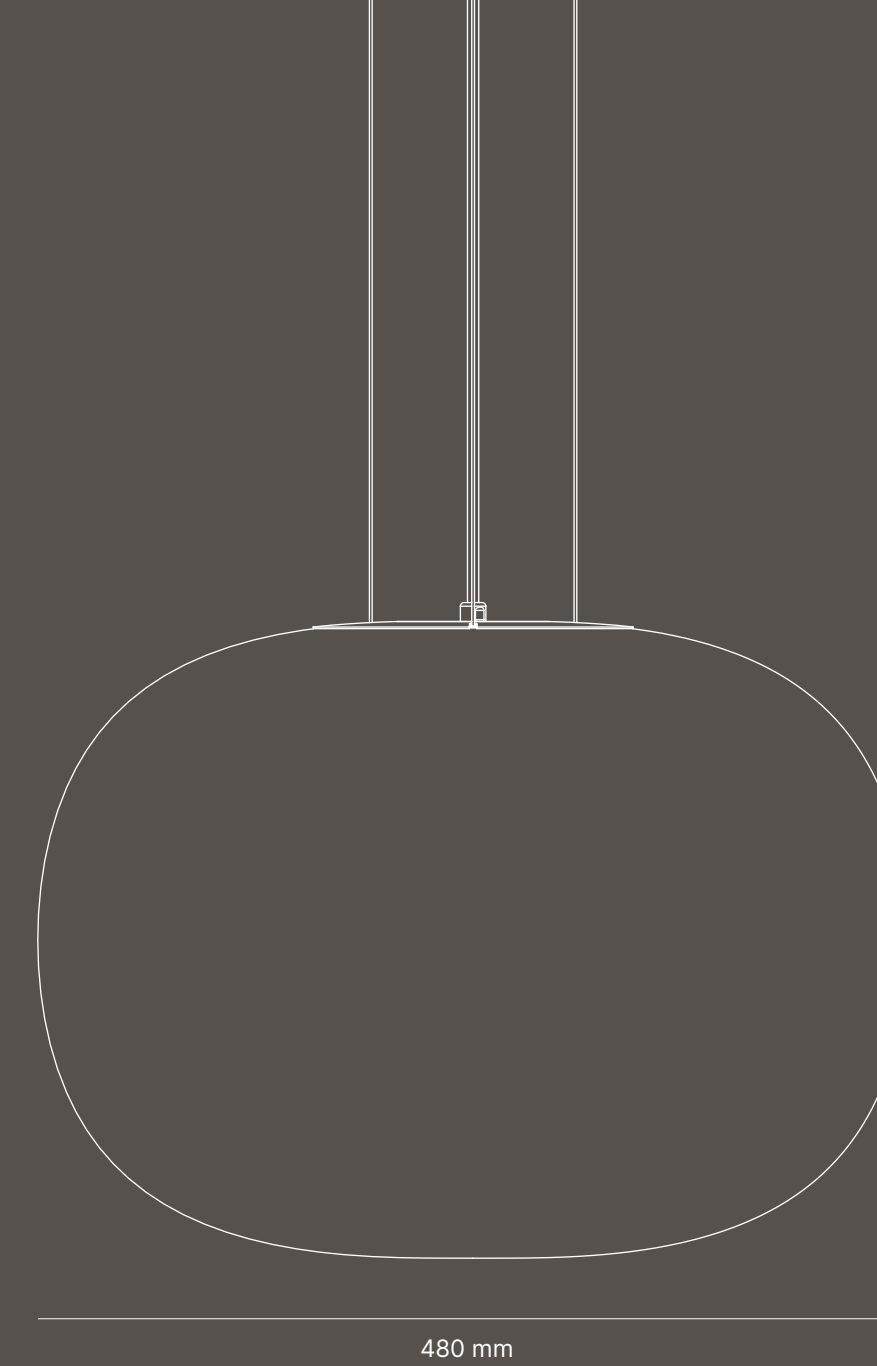

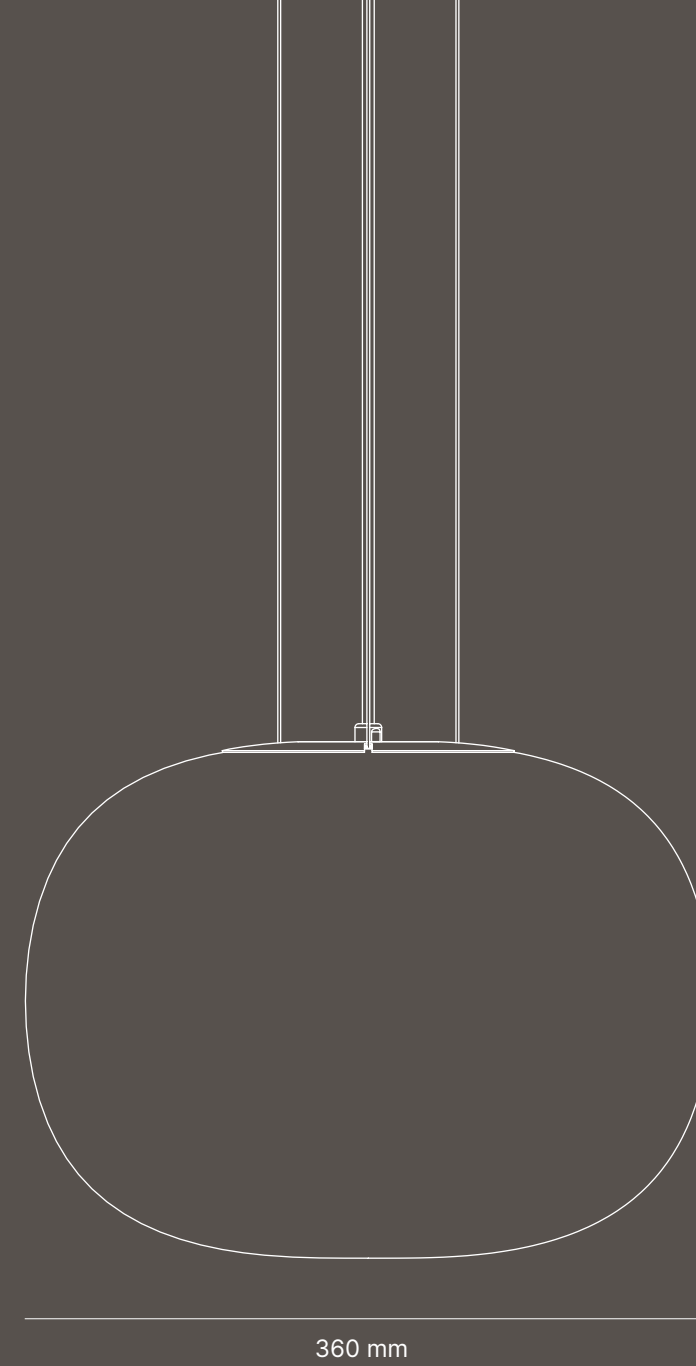

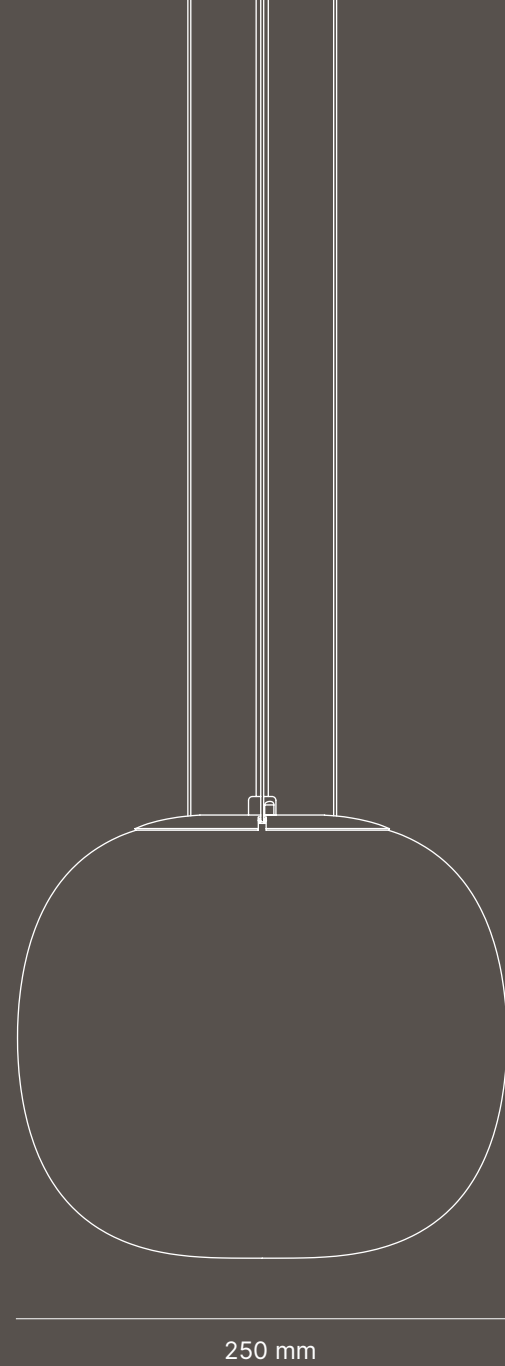

DIS has a silicone diffuser inside an acid treated glass dome. The dome is manufactured using a classic glass blowing technique so minor differences in the finish can occur between the individual glass domes

DIS

Light source	LED
LED Colour temperature	3000 or 4000 K, Tuneable White 2700–6500 K
Drivers	DALI / Switch-dim
Body material/colour	Acid treated glass
Optics	Silicone dome diffuser
Cable/wire length	2 or 5 metre wire and halogen/PVC free textile cable in white.

Capturing the Scandinavian Light

LUN lets you linger in the slow Scandinavian twilight. Its soothing and inviting qualities thoughtfully evoke a sense of tranquillity and possibilities. LUN is designed to recreate the delicate Nordic light.

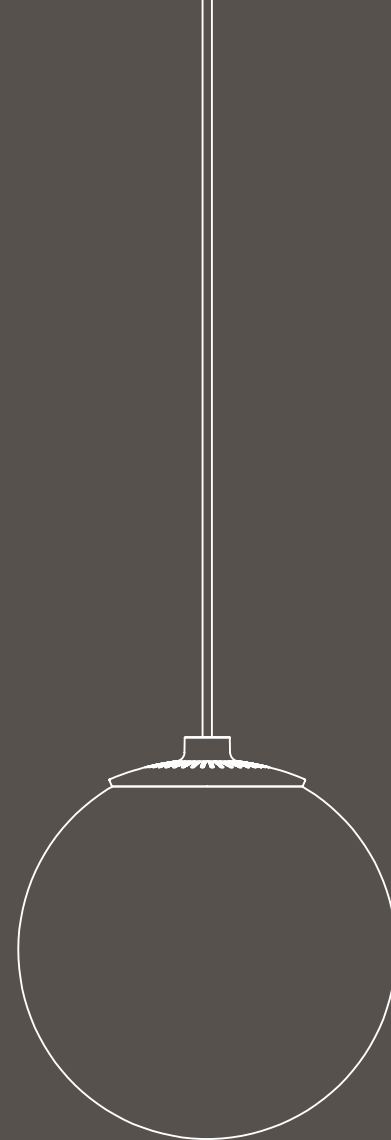

The pendant takes the form of a sphere. It radiates a soft and diffused light, creating a calm atmosphere of comfort. LUN is available in three different sizes, allowing you to find the perfect fit for any environment.

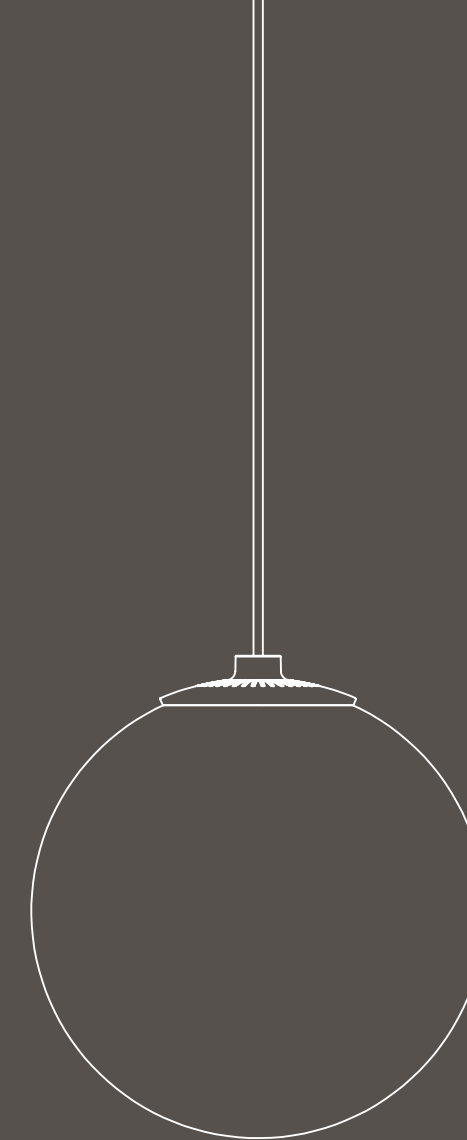

LUN

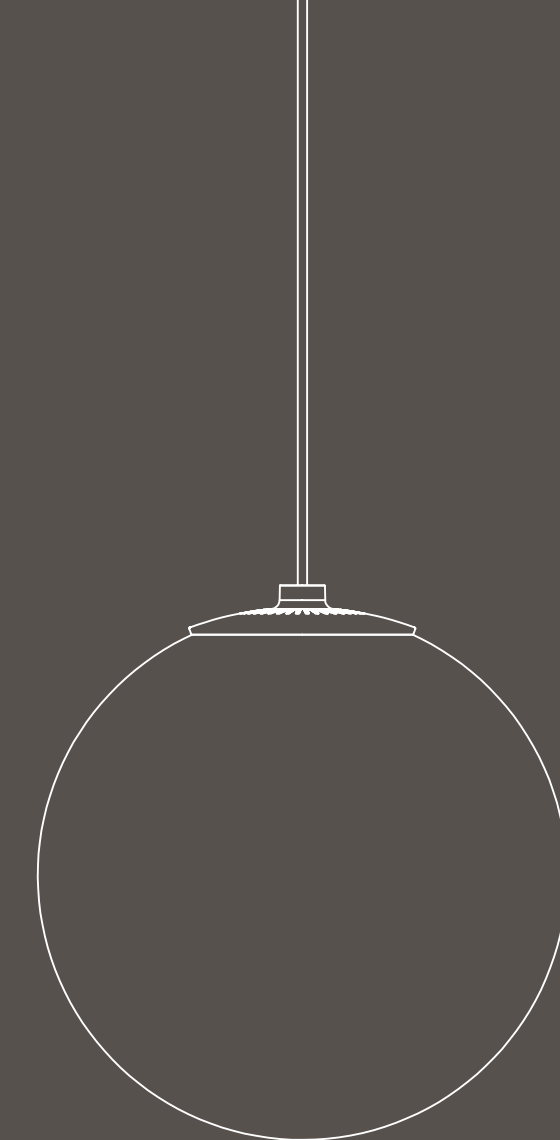

Light source	LED
LED Colour temperature	3000 & 4000K
Drivers	DALI/Switch dim in ceiling cup or in-track driver for track mount.
Body material/colour	Steel rod and plastic top in black. Opal glass shade.
Optics	Polycarbonate inner diffuser.
Cable/wire length	2 & 5 metres. Longer suspension on request.

ALP

Untamed elegance

Indulge in the beauty of ALP's elegant form and sleek lines, as it beckons you to discover a world of majestic peaks and the grand Nordic landscape. ALP thrives in social areas and public spaces, effortlessly creating a captivating ambiance. With the confidence to make a statement on its own, it adds a touch of uniqueness when combined in various sizes and colours.

ALP introduces a contemporary aesthetic with its powder-coated steel shade, giving it a modern look and feel, adding a touch of sophistication.

FRÖ

The core

FRÖ is the core of all pendants in the Nordic Collection. With its clean lines and satin-smooth finishes, it blooms by itself and when united with other FRÖ pendants.

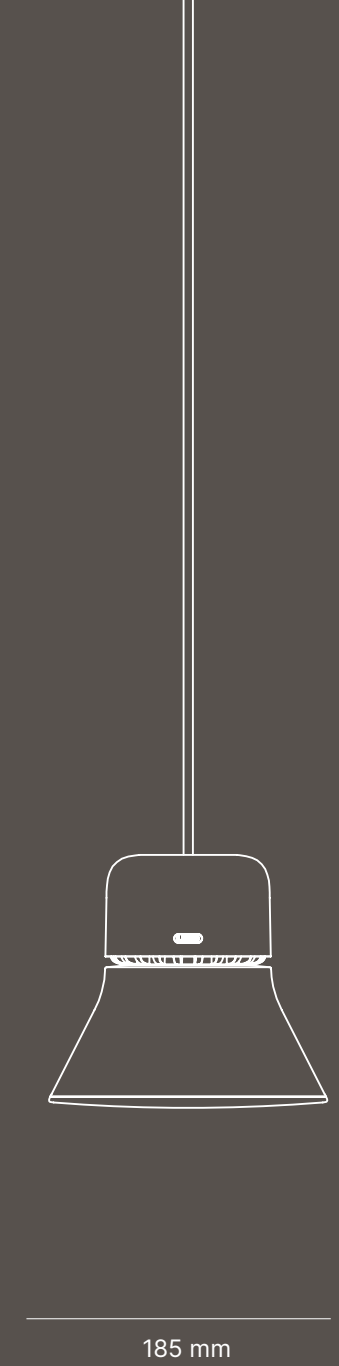

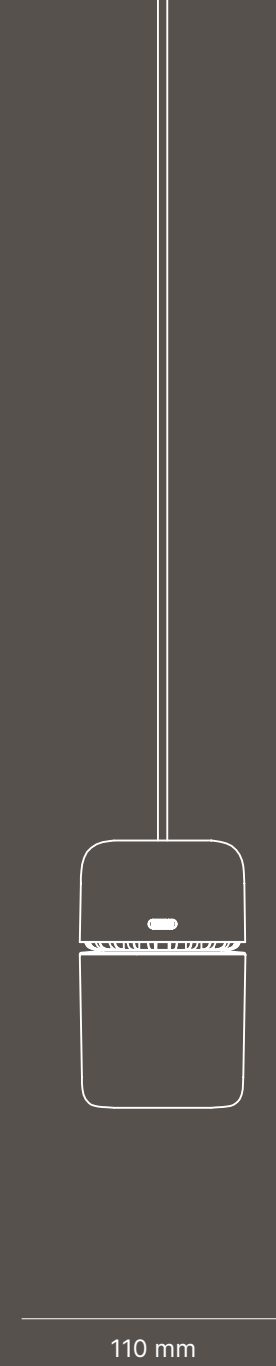

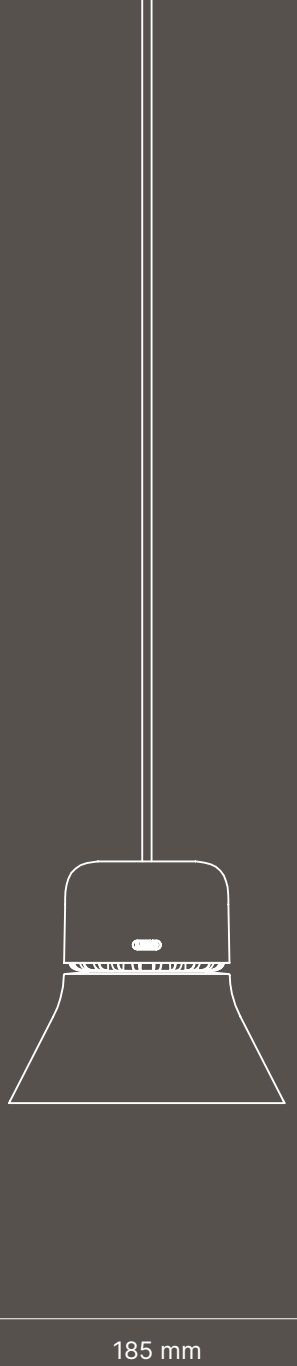

The pendant is found in three variations inviting you to create your own unique expression. Unleash a flourishing harmony by arranging FRÖ in groups, aligning them in lines, or suspending them at different heights.

FRÖ

Light source	LED
LED Colour temperature	2700, 3000 & 4000 K
Drivers	DALI/Switch dim in ceiling cup or in-track driver for track mount
Body material/colour	Plastic top over LED engine - Plastic reflector and diffusers.
Optics	Plastic shade in: opalic tube, opalic cone or black cone reflector.
Cable/wire length	2 & 5 metres. Longer suspension on request.

Luxo Colour Concept

The Luxo Colour Concept is developed in cooperation with independent designers and aims to reflect current trends in home and office environments.

The current collection is inspired by the natural colours found along the Scandinavian coastal line. Hues of green, teal and citrus chosen to seamlessly match contemporary building projects.

Black, Grey, White, Estate Green, Pleasant Green, Silk Teal, Mild Citrus

The Nordic Collection is built around an advanced core of light. Its calm and distinct aesthetics are reflected in the lamp's shapes, materials and light functions.

The collection has a logical structure and a holistic design language. The product families cover a diverse array of needs from directed light to scattered public light, and range from pure and simple to iconic and poetic.

reddot winner 2021

Award winning design

The internationally acclaimed “Red Dot” is one of the most sought-after seals of quality for good design.

In 2021 The Luxo Nordic Collection was awarded Red Dot – for its versatility in terms of materials, contours and sizes. The jury stated that the pendant luminaires of the Luxo Nordic Collection yield a highly appealing overall image.

We take immense pride in being recognized as one of the best in the field. As a brand committed to delivering exceptional design and unparalleled quality, we strive to push the boundaries of innovation and aesthetics. The acknowledgment of our achievements fills us with a profound sense of accomplishment, and fuels our passion to continue creating remarkable products in a dynamic field.

Design: Andreas Murray – Permafrost and Hans Bleken Rud – Glamox

Permafrost

Permafrost was founded in 2000 by four Norwegian industrial designers: Andreas Murray, Eivind Halseth, Oskar Johansen and Tore Vinje Brustad. From their design studio in Oslo, Norway they serve clients from all over the world.

Hans Bleken Rud

Hans Bleken Rud is a Norwegian industrial designer. He began his studies at the Art & Design College, and later graduated with a Masters in Industrial Design from the Oslo School of Architecture and Design. Since 2007, he has worked as a professional designer for Glamox.
